

# DAIRY MEMBRANES

## INTEGRATED MEMBRANE CHEMISTRY SOLUTIONS

Chemco Products provides not only the chemistries, but the programs and technical expertise for all types of dairy processing membranes.

### Program Features & Advantages

Customized cleaning & sanitation membrane programs

In-house expertise and partnerships with membrane manufacturers & specialists

Membrane Autopsy Diagnostic Services

Automated Membrane Chemical Dispensing Equipment

Chemical cost & usage reporting

Annual CIP verifications and validations for all equipment

Pre-Audit & Audit Support

CGMP program review & support

#### Engineering Team Support

Preventative maintenance programs, and chemical feed and control installations.

#### Rapid Response Team

Technical support available for sanitation program startups, assessments, product quality support, and trainings.

### On Boarding & Sanitation Integrity Trainings

*(Spanish Translating Available)*

Principles of Sanitation; highlighting the purpose of each step in the sanitation process, emphasizing the importance of time, action, concentration, and temperature.

CGMP's; teaching Current Good Manufacturing Practices to employees.

SSOP's; aligning written documentation to current processes and providing step-by-step trainings based on updated SSOP's.

Chemical Safety: teaching staff the chemical classifications, how to access and SDS in emergencies, proper PPE, and safe handling of chemicals.

Fundamentals of Membrane Filtration; identifying the different types of filtration membranes (RO/UF/NF/MF) and applications in processing.

Membrane CIP: CIP fundamentals and troubleshooting, as it applies to all products and their purpose of cleaning and sanitizing.

### Product Categories

Alkaline Cleaners

Enzyme Detergents

Acid Cleaners

Surfactants

Sanitizers and Soaks
