

OIL & GAS REFINERIES/ OFFSHORE OIL & GAS, ONSHORE OIL PRODUCTION

Chemco Products Company formulates and manufactures environmentally safe products for the Oil & Gas Industry. Specializing in industrial cleaners/degreasers, chem-cleaning, odor control products, water, and wastewater products. We also design in-plant cleaning/foaming systems for our cleaners, along with misting systems for odor control products.

Industrial Cleaners

CHEMSTAR SUPERCLEAN RTU 25 (FL9238):

A ready-to-use product that meets A.Q.M.D. Rule 1171/1122 requirements of 25 grams per liter (gm/L) V.O.C. Chemstar Superclean RTU 25 also contains detergent boosters for more effective cleaning.

CHEMSTAR CONCENTRATE (FL9884):

A blend of natural solvents, detergents, and surfactants. Chemstar Concentrate is concentrated and is recommended for use with our portable foaming systems. Chemstar Concentrate must be diluted with water at a 5:1 ratio to meet A.Q.M.D. Rule 1171/1122 or 25 grams per liter (gm/L) V.O.C.

CHEMSTAR CONCENTRATE "R" (FL11537):

A blend of natural solvents and detergents. Chemstar Concentrate "R" contains the same benefits as Chemstar Concentrate (FL9884). Chemstar Concentrate "R" is less dependent on D-Limonene. This has been achieved by adding DFE green solvents. Chemstar Concentrate "R" must be diluted with water at a 5:1 ratio to meet A.Q.M.D. Rule 1171/1122 or 25 grams per liter (gm/L) V.O.C.

CHEMCO 33-S (FL0041):

An alkaline based product designed for your steam cleaning needs.

Foaming Systems

Portable Foaming Carts
Portable One-Way Foggers
Custom In-Plant Foaming Systems

Recommended for use with our industrial cleaners. Using a portable foamer that administers high volume wet foam has the advantage of keeping the surfaces coated with chemical for a longer period. This will control chemical use with consistent dilutions.

Chem-Cleaning

CHEMSTAR PLUS 22 (FL11493):

A natural blend of solvents, detergents, and surfactants. Chemstar Plus 22 is designed for tank cleaning, hydro-blasting/steam cleaning, degreasing, and chem-cleaning for Turnarounds.

Chemstar Plus 22 is also used for sweetening/de-oiling/degassing applications, fin-fan cleaning, and pipeline cleaning.

Odor Control Products

GREEN APPLE ODOR CONTROL (FL9238)

GREEN APPLE ODOR CONTROL PLUS (FL9502):

A more concentrated version of Green Apple Odor Control (FL9238).

JASMINE ODOR CONTROL (FL11432)

JASMINE ODOR CONTROL PLUS (FL11585):

A more concentrated version of Jasmine Odor Control (FL11432).

Chemco's odor control products are concentrated and designed to neutralize and eliminate hydrogen sulfide odors, foul odors, and gases from waste products.

Misting Equipment

Portable misting cart units, skid-mounted units, panel-mounted units on a stand, trailer-mounted units, and tank mount units. Systems operate with a water-driven Dosatron pump and operate without electricity; it uses the flow of water as its power source.

Portable misting units are available for weekly or monthly rentals.
